

Bentec Drilling & Oilfield Systems is one of the world's leading manufacturers of drilling rigs and oil, gas and geothermal rig systems. Bentec, a company of the Abbot Group Ltd., is based in Bad Bentheim, Germany. We are also represented worldwide, with branch offices in Russia, Central Asia, on the Caspian Sea and in the Middle East. In order to further develop our national and international activities, we wish to fill the following position as soon as possible:

Product Manager

for the following business segment:

Electrical Products

Role and responsibilities:

- Analysis of markets and potentials for our innovative products and inclusion of market requirements in the product development process
- Providing technical guidance for our customers in terms of selecting products and defining specifications
- Providing (technical) support for our international sales team in order to acquire and support customers and prospects
- Supporting sales with the preparation of quotations and definition of technical specifications based on customer requirements
- Intensive consultation with sales and product development
- Communication of new product ideas to customers, sales and development
- Management of the entire product lifecycle

Required skills:

- Degree in engineering (electrical engineering)
- International experience of product management and specialist investment goods, preferably in the oil and drilling technology sector
- Willingness to travel and mobility
- Commitment, motivation, determination and ability to close sales
- Communication and team skills
- Fluent command of German and English, other languages an advantage

Opportunities:

- Working as part of a committed, motivated team within a successful, growth-orientated company
- A varied range of responsibilities with career prospects in an international context
- A performance-linked salary and the social benefits of a modern company
