

## Quality Management

Quality is the key to success. Therefore, our Quality Management System (QMS) guarantees a continuous improvement of all processes and products to fulfil international standards and codes of practice and to assure our capability to innovate. Due to these ambitions we are able to meet highest demands and to create products that are state-of-the-art. Our goal is your complete satisfaction with our products and services. Hence, the Bentec QMS makes sure that we analyse your wishes exactly and comply with your desires and have the flexibility to react on the varying needs of our customers.

The Bentec QMS is certified according to ISO 9001:2000. Due to the fact that the health of all involved personnel, the safety of our products and the protection of the environment are the main goals of our corporate policy, Bentec's HSE system is of course SCC\*\*-certified. The whole process, from product development to fabrication is continuously reviewed. Where it is necessary or required we cooperate with classification societies (such as DNV, BV, GL, LR, ABS, Lloyd's, TÜV) who inspect, check and certify our products. It's understood that we only provide safe and excellent equipment and our staff is well-trained. As a matter of course, Bentec is familiar with all established national and international standards.

Bentec is officially authorized to use the API monogram for manufacture and repair on drilling & oilfield equipment as specified under API 4F, API 5CT, API 6A, API 7, API 7-1, API 8C, and API 16A. In addition, we are also permitted to perform tubular thread repairs and services in accordance with API and Vallourec & Mannesmann licences.
